## CALIFORNIA

California is alive with activity in parapsychology, metaphysics and other significant areas of human growth potential. Uni-Com Foundation directly supports this activity by serving as its information hub.

The major service which the Foundation now provides is UNI-COM GUIDE, a **monthly** calendar of spiritual and personal awareness activities scheduled throughout California. This popular publication allows "new age" organizations to announce in advance the dates and contents of their meetings to a large and interested audience of individuals and other organizations. The cost of publishing UNI-COM GUIDE is supported by paid advertising and by modest subscription fees of \$3/year, or \$5/two years.

In the process of gathering information for UNI-COM GUIDE, the Foundation becomes aware of leaders who are available for service in counseling, speaking, teaching, research, seminars and retreats. Frequently this awareness, discreetly coupled to organization needs for such talent, results in effective new relationships. Uni-Com Foundation does not solicit funds for this and other informal services but is supported by those who see the value of such work and voluntarily wish to become a sustaining part of it.

Uni-Com Foundation is a non-profit and non-denominational corporation which lovingly encourages the achievement of a loving society. Uni-Com also offers two additional services of a mail order book catalogue and a small monthly pamphlet of articles by Metaphysical teachers.

DR. EDGAR MITCHELL, Former Astronaut

## Planetary Problems and the View From Space—

Within the experience of all of you, I am sure, there have been moments that seemed like eternity. But I think we also recognize that within our own minds, at the proper level of consciousness, eternity can be perceived in less than a minute. In the vastness of universal space and in the boundless flow of time, I believe that life on planet earth is poised at a very crucial juncture in its evolutionary path. Let's raise our eyes a moment to the heavens. Let's look at the Cosmos. Let's think on the universal level.

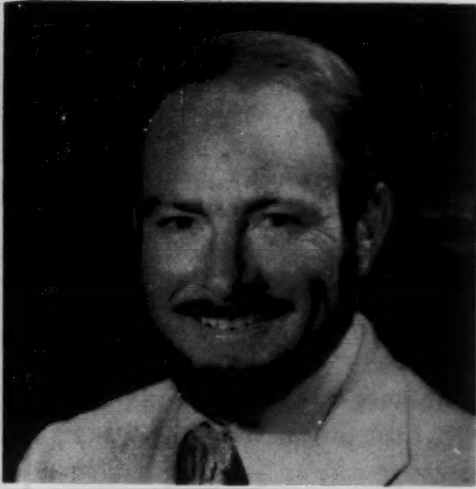

Within the universe, as we perceive it, stars are being born. They are moving into the mainstream of stellar evolution. They are living their lifetimes, and they are being extinguished in a well-ordered process that was in existence long before consciousness evolved on this planet. This universal functioning has gone its harmonious route over countless eons and will undoubtedly continue for countless more.

But mankind is now full grown on planet earth. He has reached a stage of natural evolution and intellectual sophistication where the temper tantrums and egotistic behavior of the learning years can and are ravaging the earth by wasting the resources, fouling the environment and destroying life forms.

If that occurs, the universe will go on functioning. It will go on its harmonious way of evolving new stars and new planets and new life. For the failure of the human species on planet earth to meet the challenge of maturing and gaining harmony with universal functioning will only cause a tiny pulse in the pattern of life in the universe.

But, I submit to you, it need not be that way. Man can rise to the occasion. He can save himself and he can save his planet from the seeds of destruction that have already been planted. Man can take stock of himself and realize that only by a new mode of thinking, new institutions, a new holistic approach to planetary functioning, a new submergence of egotistic behavior, a new altruism, a new attunement to universal consciousness and the patterns of evolution within the universe—only this way can the course of history on earth be diverted from certain destruction.

Man has used his five senses and extended them with new inventions not only to see distant reaches of the galaxy but also to probe the lowest orders of the micro-

scopic universe. He was led to this not by his power of objective thought but by his creativity, his intuition, his inspiration -- in short, his subjective awareness. But this is the way of consciousness; it is not the way of science. Why? Because the views are all different. If we view the world from under the water as a fish, we see a very watery world. Or as we view the world from the North Pole, the world seems all ice. And if we view it from the tropics, the world becomes all hot jungle. We would interpret the world quite differently if we were limited to each of these situations.

We have made a great mistake. We have presumed that all the world is as we see it and all the inhabitants are as we are. But we can do this no longer. We must see not only the tiniest view. We must also rise to see the broadest view if we are to understand the way we function in the universe.

I would like to tell you about my view from space. I went into space as pragmatic a scientist as there ever was. Looking only at the objective data. Trying to interpret things in terms of classical engineering. But when you view this planet from the far reaches of space, you cannot avoid the profound effect it makes. You cannot look at this planet as a small ball of blue and white floating in the vastness of universal space without realizing how insignificant the planet is in terms of universal functioning. We think we are sophisticated. We think we are part, an important part, of life in the universe and of life on the planet. But only when you can perceive the whole planet as a ball no larger than your thumb do you realize that maybe it is only our perspective from close up that gives our egos such a boost.

We don't have much choice but to find a new way of functioning, a new mode of thought to lift ourselves out of the chaos that we find ourselves in. I suggest that our current behavior on planet earth is near to mass insanity because we are driving ourselves deeper and deeper into behavior that is environmentally unacceptable and that will eventually cause our destruction.

But I see hope for the situation, I see that we can, indeed lift ourselves by our bootstraps into a new way of thinking if we have the desire to do so.

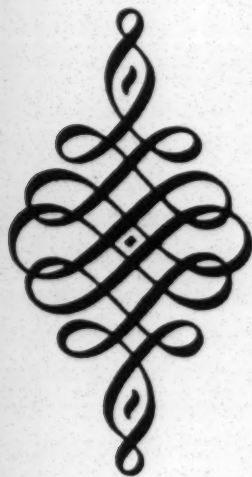

In any event, whatever the answer, there is no longer room for disharmony on the planet. We must find the proper way to function, whatever the ultimate answer may be. If we are to move from chaos to harmony, we must utilize the best in science, the best in technology and the best thinking from the highest state of consciousness in a harmonious melding of systems within systems.

It starts with individuals as they search for understanding of self, as they go about trying to live without fear and attempting to live in harmonious accord with their environment and their surroundings.

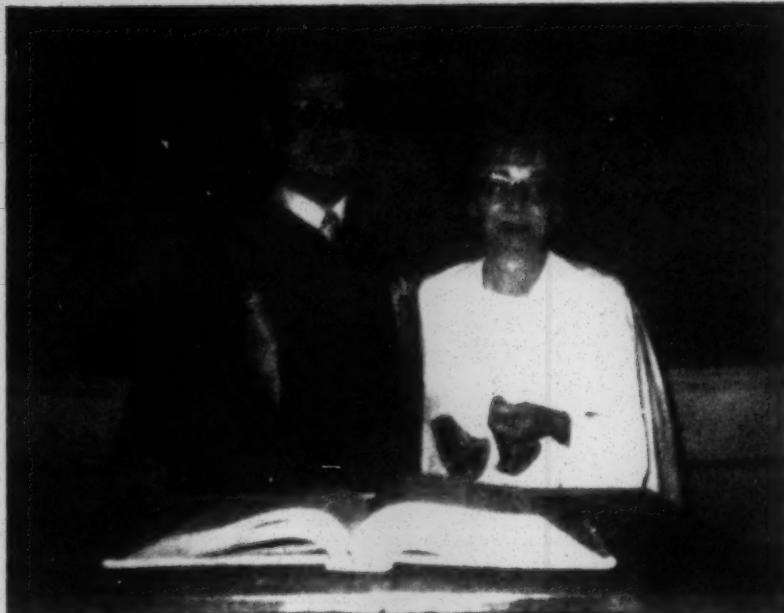

However, every once in a while you get confused in your day to day search, your day to day investigations, and you need a guiding star so that you go back to it and reset your course. If the investigations in parapsychology do not contribute to man's overall understanding of the mind-body totality, we are doing nothing.

I think that is the sort of guiding light that each of us needs, regardless of whether we are professionals in the field of parapsychology, or professionals in the field of physics, or professionals in management, or whatever our daily task is. We must unite and agree upon this common goal -- that our immediate objective is human fulfillment of each individual and its harmonious attunement to universal functioning. And in that way it will spread from individual to communities, to nations, and to the whole planet.

I submit to you, that this process starts with each one of us in our own lives. It starts with attuning our consciousness to a higher order of thinking. The investigations in psychical research and consciousness research are, in my opinion, a driving force for this change. It is my belief that as we reach for a higher mode of thinking, understanding of the psi process will come easily and naturally. It will become apparent to us. I believe that the psi process is a unified process in all its many manifestations. It is not isolated; it is holistic just as the universe is holistic. And as we raise our sights and our goals and evolve our consciousness the functioning of psi within each of us will take its natural place along with the five senses that we use in our day-to-day living. To me, this is the real way psychical research should go. And not only psychical research, but each and every individual who is searching for knowledge and is searching to find, in essence, himself on the planet earth.

*TO YOU,*

*VICTOR AND ELEANOR*

**We, The Staff of The Uni-Com Foundation would like to dedicate the October issue of The Uni-Com Guide to two very dear friends, Bishop Victor and Rev. Eleanor Button, Founders and Directors of The Chapel of Prayer in Redwood City. The Buttons have been one of the "Family" of organizations listing program material in the Guide since its beginning in 1970. They are now going to spread their teachings to the State of Texas. We know their many friends throughout the state join with us in extending our best wishes to a successful Church in Texas.**

## *FROM THE DIRECTOR*

We are glad to see the tremendous steps being taken to bring the scientific and spiritual communities in harmony with each other. Many groups that have been geared only to scientific "data and fact" are now exploring new "terms" and methods of information that until this time has concerned only those interested in spiritual growth and potential. A new consciousness and acceptance seems to be being developed that will bring about a wider knowledge of the paranormal, of the unexplained side of life. We urge all groups to communicate more, let their work be known. Only in this way can we help both spiritual and scientific community. Much research is being done in the fields of healing and related medicine, meditation, in fact in all fields. We encourage all to join in and take part. Let your "light" shine in, bringing about the new age consciousness.

Protege of the late Dowsing Mentor, Verne L. Cameron, presents a most unusual LECTURE and DEMONSTRATION on DIVINING at all levels, local, and remote locating (Map Dowsing) as perceived with a variety of instruments and a developed, higher sensory awareness.

Cox details the means used in locating underground water, oil, minerals, ore, and other buried or hidden substances, along with a system for seeking missing persons, animals, and lost objects.

And with actual cone models and Great Pyramid Replicas, Cox explains the relatively new science: "ENERGY OF FORM" (Free Energy) as measured with Dowsing instruments. He establishes how the natural accumulating, self-contained power in Pyramid Structures preserves and mummifies organic substances such as meat, fish and flowers, sharpens cutlery (even electric razors), and produces mysterious time-warps, observable kinetic effects, vortexial force-fields, hand levitation, and strange tactile sensations.

PALO ALTO, CALIF. 94306

was born with a rare gift of God, "knowing the unknown." Her talents in the psychic world are limitless — encompassing reading the human aura, crystal ball reading, psychometry, automatic writing, grapho-analysis, clairvoyance, out-of-body experience and many other phases of psychic awareness. With such awesome talent, Mrs. Jensen is in constant demand for her captivating lectures, demonstrations and in-depth workshops and seminars on ESP and the psychic world.

She recalls a childhood with two psychically gifted parents so it is small wonder that at age three, she was reading the preacher's mind during Sunday service and telling the congregation in her childlike way that he was thinking about getting married but talking about something else. At

age seven she knew of her father's death before being told and emotionally dissolved when she became clairvoyantly aware of the impending death of her brother-in-law when she was thirteen.

A native of Texas, Ann Jensen is the mother of two outstanding sons — one a doctor, the other an active church leader and music store owner. With her husband, Andrew, she resides in a beautiful colonial home located in a quiet, wooded suburb of Dallas.

Mrs. Jensen emphatically defends ESP against the skeptics who compare it to witchcraft or black magic. She feels it is a sacred, God-given gift to everyone, but selfishness and prejudice have strangled this ESP, psychic or soul quality in most people. Ann can look at you for a few moments and know a great deal about you, your family and your background.

Mrs. Jensen teaches and lectures throughout the United States and Mexico on ESP and how to open these psychic centers within ourselves. Besides the lectures and entertainment for which a psychic is in demand, she receives a constant stream of requests for help and does "see" individuals professionally as time permits.

A member of the Christian Church, Mrs. Jensen is keenly aware that her psychic power is a sacred gift. "As a psychic," she explains, "I have always felt I have access to a power that comforts, strengthens and aids. I reach this power through prayer. Many times the prayer is wordless. It is just the shifting of my awareness into a certain flow in which I am centered. I know I am the child of a Father of love, compassion and wisdom. This is a very tender and personal love. I know all people have this God within them and that He loves all even as He loves me. The word psychic is from the word psyche, which means soul," she says. "Everyone has a soul and the soul is God within." People must be trained to become aware of God in one another. We are all brothers, no matter what we feel." Mrs. Jensen says that, "when my psychic power is 'turned on,' I get a sense of levitation and heightened awareness." She feels completely passive, "afloat in the cosmic stream."

She believes that, like muscular strength, psychic strength can be developed through exercise. One of the principal exercises is learning to concentrate. In her classes she recommends this simple exercise for beginners: Put a bowl of water in a still place — no drafts. Float a toothpick on the water. Wait till everything is still. Concentrate on the toothpick and make it move. It is as simple as that.

*Testing* Ann Jensen is widely known among psychic investigators. She has done controlled experimental work in laboratories at Duke University with Dr. J. B. Rhine, Dean of Parapsychologists; with the late Eileen Garrett, President of the Parapsychology Foundation; and with Dr. Karlos Osis, Director of the American Society for Psychical Research in New York City.

In 1940 Mrs. Jensen and Dr. Joseph H. Rush did an experiment in long distance thought-transference that was evaluated and documented in the "Journal of Parapsychology" (June 1941) by Dr. J. B. Rhine. The experiment dealt with a period from April to August when she and Dr. Rush sat each evening at a specified time and sent mental messages to each other. Each recorded the messages they sent and those they received. The results show correlation far above chance, providing strong evidence for telepathic communication.

Do you know about the Free Kitchen for the poor at  
 Christananda Ade Shakti Ashram, 50 S. 4th St. San Jose?  
 .....Food served from 2 to 3 PM every Fri., Sat.,  
 Sun., and Mon.....The young group at  
 Stanford, called The Bridge, are doing a marvelous job  
 of promoting goodwill and teaching.....  
 Watch for good developments from the consciousness  
 trip that Lee and Liz Stewart are taking to the east  
 coast. It should bring about some tremendous joining  
 together of groups across the country.....  
 Welcome home to David Spangler.....  
 Drop by and see the newly remodeled Metaphysical  
 Center at 420 Sutter in San Francisco, you will like  
 it!.....Joellen

Here is a book as complex and individual as you are. It's not light reading because it's your life, your astral biography, from the details of your inner feelings to your outermost ambitions.

Sun-Moon polarity, as the connection between conscious drives and unconscious feelings, is discussed at great length.

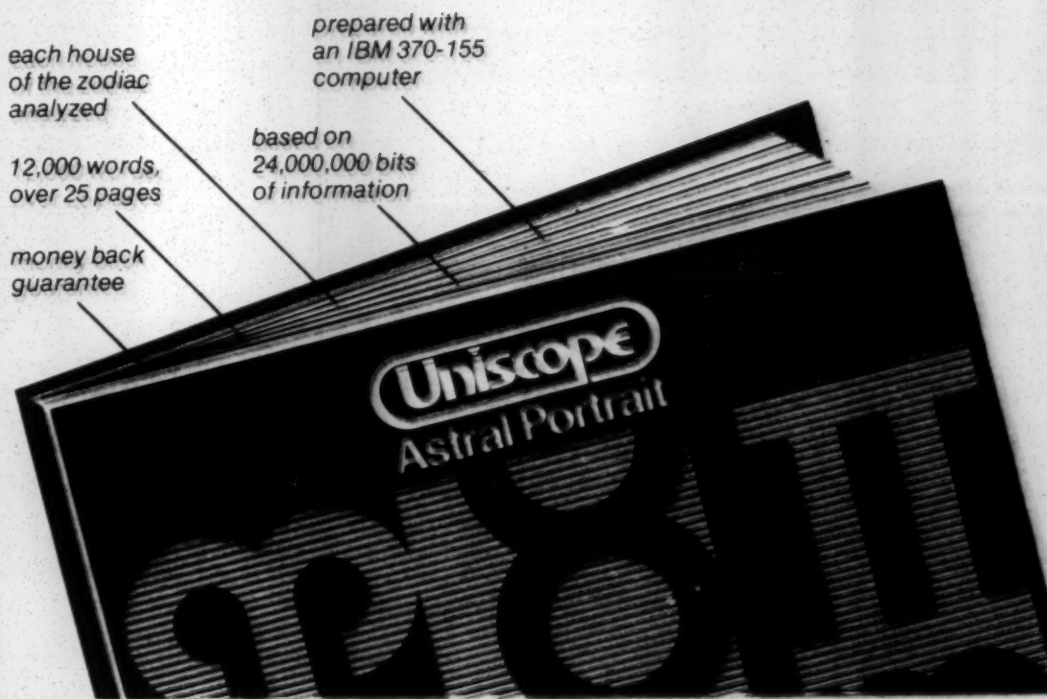

The ascending sign and its rulership position is interpreted as your personality, as your approach to life. Each house of the zodiac is described in terms of planets, rulerships and aspects.

This is not a vague report based on generalities. From your exact time, day, year and place of birth our IBM 370-155 sorts out 24,000,000 bits of astrological information. The result is a 12,000 word personal biography revealing secrets that even your closest friends would not dare talk about.

How is this possible? An astrologer does basically the same thing, but it takes longer and costs more. The computer is simply a memory bank. Only the information that applies to you and only you is drawn from the bank.

All this is yours for only \$10. It's the best buy there is in computerized horoscopes. Plus a money back guarantee if your Astral Portrait isn't what you expected.

Think of it as a reference book, to be studied from time to time. We've got the best available, anywhere, at anytime... and at any price.

## *The Art of The Cosmos*

The Art of The Cosmos, is a beautiful experience of blending colors and images that touch a deep spiritual awakening within each student. Work is done with the hands, no brush or pallet, using techniques that have been developed over many years. When the hand comes in contact with color a very strange and wonderful feeling is in store for the student . . . Classes are usually conducted with a background of music. The student has the opportunity of learning self awareness, creativity and spiritual advancement through these techniques!
